SUMMER BREAK ENRICHMENT WORK

Dear Parent,

With summer holidays around the corner, our hearts swell up with a spectrum of emotions. To maintain educational continuum and to keep in view the rejuvenation you need, an enriching homework for the holidays has been designed to keep them constructively busy.

This year's Summer Enrichment work is **centered around the seventeen UN Sustainable Development Goals (SDGs)** with an objective to enhance the students' knowledge on the 2030 Agenda for Sustainable Development. Each class has been assigned an SDG Goal and a few simple and interesting tasks have been assigned to enhance their creativity through exercises on the SDG implementation.

The students' work will be exhibited during **MERAKI** – an **Exhibition of Scholastic and Co-scholastic subjects**, in the month of July. The project work assigned to the students has been planned to unleash the hidden talents of students and provide them with an enjoyable learning experience. We would appreciate it if your child completes all tasks and submits the holiday homework by 10th July 2023.

We wish you and your family a happy bonding time during the vacation.

The school will reopen after the summer break on Monday, 3rd July 2023.

Warm Regards

Ms. Nidhi Tewari
Principal
